

EMAN ABID

Web Developer | PHP & Laravel Specialist

📞 03016622322 ✉ emanabid170@gmail.com 📍 Gujranwala, Pakistan 🌐 <https://eman-abid.github.io/>

PROFESSIONAL SUMMARY

Results-driven Web Developer with 2+ years of professional experience in full-stack web development using PHP, Laravel, and modern frontend technologies. Proven track record of building scalable, secure, and user-focused web applications including trading systems, inventory management platforms, and complaint portals. Collaborative team player who actively participates in code reviews, maintains technical documentation, and continuously adopts emerging web technologies and best practices.

PROFESSIONAL EXPERIENCE

Web Developer

November 2023 – Present

PMS Pvt. Ltd. — Gujranwala, Pakistan

- Developed and maintained full-stack web applications using PHP, Laravel, HTML5, CSS3, Bootstrap, and jQuery, contributing to improved system efficiency and user experience.
- Designed and implemented responsive, user-friendly web interfaces in close collaboration with cross-functional teams, adhering to responsive design principles and best practices.
- Integrated jQuery and AJAX for dynamic content handling, reducing page load times and enhancing application interactivity.
- Participated in code reviews and contributed to improving coding standards, ensuring clean, maintainable, and well-documented codebases.
- Debugged and troubleshooted application issues across frontend and backend layers, optimizing performance and reliability.
- Maintained comprehensive technical documentation for development processes, workflows, and project specifications.
- Utilized Git for version control, managing source code across development and production environments.

KEY PROJECTS

Trading & Inventory Management System

PHP | Laravel | MySQL | jQuery | AJAX

- Built a comprehensive platform to manage inventory, track real-time transactions, and monitor sales data with financial reporting capabilities.
- Implemented order processing, customer management modules, and dynamic dashboards with AJAX-driven data updates.
- Designed optimized MySQL schemas for high-volume transaction data, ensuring query performance and data integrity.

Customer Complaints Portal

PHP | Laravel | MySQL | Bootstrap

- Developed a full-stack complaint management system for logging, tracking, and resolving customer issues with role-based access control.
- Implemented automated email notifications, service feedback collection, and performance analytics dashboards.
- Designed a responsive UI using Bootstrap ensuring consistent UX across all device sizes.

HRM – Human Resource Management System

Laravel (API-based) | MySQL | Facial Detection Integ.

- Developed a comprehensive Laravel API-based HRM system with multi-branch support and dynamic role-based access control.
- Built applicant and employee management modules covering the full employee lifecycle including transfers, promotions, demotions, and commission & salary package configurations.
- Implemented dual-mode attendance tracking – manual entry and automated camera-based facial detection for real-time employee identification.

- Developed branch-wise monthly salary sheet generation with dynamic payroll calculations based on attendance, commissions, and salary structures.
